SERVICE BULLETIN

MEWP Radio Control System Support

Doc. No.: 601028-02

Date: 30/10/2020

Rev No.:	Date:	Author:	Description:
	30/10/2020	Peter Danks	Original Issue

Applicable Vehicles:	MEWP Serial Numbers 1180-1523
Issue Date:	30 th October 2020
Overview:	Discontinuation of PRO-M control system

1 Introduction

The purpose of this Service Bulletin is to inform owners of Redmond Gary Australia (RGA) MEWPs with serial numbers **1180** through to **1523**, that the manufacturer of their PRO-M radio control system will be stopping spare parts support.

AUTEC has advised that 2020 will be the last year where the supply of spare parts is guaranteed.

RGA is currently working with our control supplier to engineer kits to allow the current AUTEC “Dynamic series” system to retro fit to units running the PRO-M series controls.

More details on these kits will be communicated as they are developed and costed.

RGA will continue to offer control repairs and parts support for the PRO-M series while our spare parts supply allows.

Please contact Redmond Gary if you have further questions.
